

## Professor Cláudia Cavadas

### **Neuroendocrinology and ageing: from mechanisms to translational approaches**

Cláudia Cavadas, PhD, is Vice Rector for Research at the University of Coimbra Portugal and director of the Institute of Interdisciplinary Research. She is a professor at the Department of Pharmacology and head of the research group Neuroendocrinology and Aging at Center for Neuroscience and Cell Biology, University of Coimbra.

*“The Mission of Neuroendocrinology and Aging Group is to contribute to develop new knowledge in the aging field, namely to demonstrate that neuroendocrine system and related mechanisms can be targeted in experimental models to delay, stop, and in some examples, reverse manifestations of aging and age-related disorders.”*
